## Academic Background

### Higher Education (In Progress)

- Anhanguera – Systems Analysis and Development – Expected Graduation: 01/2025

## Professional Objective

To continue working in the IT field, which I have been a part of since I was 13 years old. I aim to contribute the knowledge I have acquired over the years, collaborate with colleagues, and develop, improve, and apply techniques that will benefit both myself and the team.

## Current Role

For over 3 years, I have been working independently as an IT service provider for individuals and businesses. This year, I am seeking opportunities in the formal job market within the IT sector.

## Home

2014-2025

- Full Stack in PHP, NextJS, React, JS, AJAX, REST API, Bootstrap, Tailwind, Git, MySQL, Docker – continuously learning new technologies.
  - CCTV systems, cabling infrastructure, and networks.
  - Maintenance of computers, laptops, and printers.
- Installation, updates, and repairs of software, hardware, and operating systems (Linux, Windows, MacOS).
- Currently studying Python and Laravel.

## Brazilian Army

11º Grupo de Artilharia de Campanha

03/01/2018 – 02/26/2021

- IT Department Assistant (2018–2021)
- Technical Support
- Created the Intranet (2020) using Joomla
- Network and structured cabling maintenance
- System administrator for the organization
- NAS installation (physical and virtual)

## PHP Experience

Completed a PHP project using several frameworks for a government-sponsored association in São Paulo. Currently starting a new automation project (chat-bot) via WhatsApp API integrated with a PHP dashboard for a dental clinic.
