EDUCATION

Systems Analysis and Development
Anhanguera — in progress, expected 01/2025

CERTIFICATIONS IN PROGRESS

- Microsoft Azure Fundamentals (AZ-900)
- .NET
- Python

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, Python (learning), C# / .NET (learning)

Backend & APIs

Node.js, Fastify, Express, Prisma ORM, REST, Swagger/OpenAPI, JWT, bcrypt, Socket.IO

Frontend

React, Next.js, Tailwind, Bootstrap, React Leaflet

Data & Cloud

PostgreSQL, PostGIS, MongoDB, MySQL, AWS S3, Cloudflare R2

Infrastructure & DevOps

Docker, Coolify, Linux VPS deployment, Git/GitHub, pnpm workspaces, Turborepo, custom TCP server (Node net), IoT protocols

Networking & Support

CCTV, structured cabling, hardware/software maintenance, Windows, Linux, macOS

LANGUAGES

Portuguese — Native

PROFESSIONAL OBJECTIVE

Continuing to grow as an IT professional, a field I've been part of since age 13. I aim to build on what I've already learned with new techniques and challenges, contributing to the team and constantly evolving as a Full Stack developer.

PROFESSIONAL EXPERIENCE

Full Stack Developer — Freelance

2012 — 2026

- Full Stack development with React, Next.js, Node.js, TypeScript, Fastify, Express and Prisma ORM.
- Database design and administration with PostgreSQL (including PostGIS), MongoDB and MySQL.
- Built REST APIs documented with Swagger/OpenAPI, with JWT authentication and bcrypt.
- Real-time communication with Socket.IO (WebSocket) and IoT protocol integration.
- Implemented a custom TCP server using Node.js's native net module.
- Deployment and orchestration with Docker, Coolify (self-hosted PaaS) and Linux VPS.
- Organized projects as a monorepo using pnpm workspaces and Turborepo.
- Used AWS S3 and Cloudflare R2 for file storage, and Tailwind/Bootstrap for the UI layer.
- Version control with Git and GitHub.
- CCTV, cabling and network infrastructure.
- Hardware maintenance for computers, laptops and printers, plus OS support across Linux, Windows and macOS.

Independent IT Service Provider (B2C & B2B)

4+ years

- Served individual and business clients, focused on technical support, infrastructure and systems development.

Brazilian Army — IT Support Assistant

2018 — 2021

11th Field Artillery Group

- Technical support and built the unit's Intranet (2020) in Joomla.
- Network maintenance and cabling infrastructure.
- System administrator for the organization's own systems.
- Virtual and physical NAS installation.

Neo Promotora / Sistema Oráculo

2022 — 2026

- Technical support and maintenance for computers, local and external networks.
- Managed and configured VoIP telephony systems with Asterisk and PABX.
- Network traffic analysis and monitoring with Wireshark and Grafana.
- Worked in HelpDesk and infrastructure environment configuration and management.

FEATURED PROJECT

Personal platform currently in development, bringing together most of the stack above: Node.js/TypeScript with Fastify, Prisma + PostgreSQL/PostGIS, JWT authentication, WebSocket, IoT device integration via a custom TCP server, a Next.js/React frontend with Tailwind and React Leaflet — all organized as a monorepo (pnpm + Turborepo) and deployed via Docker/Coolify on a Linux VPS.
